

About the “Free Gaza” Mission

Press Release

Tuesday June 28, 2011

The Communist Party of Greece (marxist-leninist) condemns the criminal and provocative stance of the government of Israel in its attempt to discourage the international humanitarian mission against the genocidal blockade of the Palestinian people in Gaza. The fascist, Zionist state threatens to repeat last year's murderous attack, threatens the reporters of the international media and puts pressure on governments and humanitarian organizations. Behind these threats and open state terrorism are as always the US imperialists, European governments and the UN leadership.

The CPG (m-l) condemns the stance of the Greek government which, in its attempt to dissuade the participation of Greek citizens, gives permission for piratical and criminal practices in international and Palestinian waters by the state of Israel. The CPG (m-l) notes that the Papandreou government has in recent years strengthened its relationship with Israel against the wishes of the majority of the Greek people and the neighbor Arab peoples.

The CPG (m-l) has on every opportunity stated that the support and the solidarity for the just, national liberation, and anti-occupation struggle of the Palestinian people is the affair of a mass, independent, and anti-imperialist struggle of the peoples. This struggle is against the selfish aims of bourgeois and imperialist forces which have proven many times that they can easily change sides and policies. We have noted that the solidarity movement must choose actions and initiatives that conform to their own dynamic and power and must rely on their own strength. Anyway we call upon the democratic Greek people to support the Palestinian right for life, freedom and dignity.

The Press Bureau of CPG (m-l)
