

Proletarian, Red and Internationalist May 1st

**Against imperialism – imperialist war – reaction and fascism – the exploitation, misery and oppression of the proletarians and peoples
For the Democratic People's Revolution and the proletarian and socialist revolution in every country across the world**

The world proletariat celebrates May 1st in a situation of growing danger of a new world imperialist war, which risks also being a nuclear war.

Imperialism is sinking into the quagmire of the general crisis and all attempts to overcome it are failing. That is why the main imperialist countries (USA/UE/RUSSIA/CHINA) are fighting for a new division of the world in order to gain control of raw materials, of markets in all countries of the world.

Everyday imperialism, its states, its governments, its parliamentary parties, its agents within the workers' and people's movement take concrete steps towards this new world imperialist war.

US imperialism in particular, with the Nazi-type presidency of Trump, has raised the level and intensified the march of imperialist war; It has given full coverage to the genocide of the Palestinian people. He advanced in the war with collusion and confrontation with Russian imperialism for the partition of Ukraine. Then, first the attack against Venezuela, now with the imperialist and Zionist war of aggression against Iran, aimed to overthrow the governments and establishing new puppet governments in their place, finding fierce resistance of nation and people in Iran and Lebanon

He unleashed the tariff war to unite the European imperialist powers and all capitalist and imperialist countries in the world with his plans and interests, facing their oppositions and various agreements that they feed interimperialists contradictions.

In the meantime, it has unleashed an internal war against the proletarian masses, the migrants, against the anti-fascist and anti-imperialist opposition, under the banner of racism, repression, to transform the USA into an open dictatorship at the service of big capital and on a global scale it works to strengthen and unite all the reactionary, fascist, Nazi, sovereignist and populist forces of every country.

Towards the countries dependent and oppressed by imperialism it works to unite to its front the hegemonic powers operating among the countries oppressed by imperialism in Turkey, India, Brazil, to build the winning

alliance in the new world war of partition, while nurturing and strengthening chauvinism, nationalism and fundamentalism.

US imperialism wants to get out of crisis and decadence through war, and the other imperialist powers, large and small, want to defend their specific imperialist interests.

All this leads to a situation in which in every country states and governments are getting equipped to participate in the war with rearmament, the war economy, the unloading of the crisis and the costs of the war on the proletarians and the peoples.

Inequalities between rich and poor in the world are growing more and more, poverty worsens the more the world economic crisis worsens. The capitalist/imperialists' race for profit is leading to social and environmental catastrophe. The so-called "third, fourth industrial revolutions" do not bring innovations for the development of mankind but are tools for accumulating more and more capital through financial capital.

Imperialist and reactionary wars are creating hundreds of thousands of refugees, poverty and unemployment are pushing populations from the semi-colonial regions of dependent countries, oppressed by imperialism to capitalist/imperialist countries.

The ruling classes of the capitalist/imperialist countries, as well as those of the countries oppressed by imperialism, are breathlessly trying to keep themselves in power both through elections aimed at changing the faces of the governments at their service but not the substance of power. And where there is a massive abstentionism, they openly point to fascist-type governments and regimes and police states, open dictatorships.

In the face of all this, the proletarians, the popular masses, the peoples oppressed by imperialism have no other way than to intensify the struggle, develop social and popular uprisings, armed struggles, launching people' war and movements aimed at overthrowing reactionary governments serving imperialism and the ruling classes.

These movements demonstrate with their strength and their limitations that there is no alternative to the path of Revolution: New Democratic Revolutions, Socialist Revolutions.

The main instrument for making revolution is the revolutionary party. Building and strengthening the communist parties, defending them from the plans of the bourgeoisie to annihilate them (specially against maoists: Operation Kagar in India, Repression in Philippines, Turkey etc) is today the main task and the key to advancing the proletarian and popular movements in all countries of the world.

Only the construction of the Marxist-Leninist-Maoist Communist Party allows the development of the proletarian and people's united front and the creation of the people's and proletarian army necessary for the overthrow of the ruling classes in each country and of the imperialist system on a world scale.

The Marxist-Leninist-Maoist Communist Parties must be formed and developed in the fire of the class struggle strictly linked with the masses, as workers' vanguard detachments, units capable of leading the proletarian and popular struggle, the political struggle, in the context of the different countries, to develop the class war, the revolutionary war, the people's war. Marxist-Leninist-Maoist communist parties capable of analyzing the errors and defeats of the communist movement, of the past as well as those of today; capable of guiding the direct experience of the proletarians, of the masses and the movements of struggle.

The communist parties engaged in the people's war and all parties and organisations that work for this and for the revolution must play a vanguard role, in a constant struggle against revisionism and 'leftism', for building the international communist organization, an unified international organization, under the banner of Marxism-Leninism-Maoism to lead the proletariat and the popular masses in the capitalist, imperialist countries and countries oppressed by imperialism in the revolutionary struggle for socialism.

To this aim, it is necessary to create today a unitary International Communist Forum capable of helping to lead the proletariat in the capitalist and imperialist countries and in the countries oppressed by imperialism in the struggle, mobilizing all the anti-imperialist forces, the national liberation movements and the advanced parts of the movements against war, fascism, reaction and repression, genocides, territorial and environmental devastation.

This is today the necessary stage to advance in the reconstruction of the International Communist Movement and a new Communist International.

The world is faced with the epochal clash between imperialist war and revolution for the liberation of proletarians and peoples.

The teachings and slogans of Lenin and Mao are back really clear

Lenin

'Transforming the imperialist war into a civil war'

'Imperialism is the dawn of the world revolution of the proletariat'

'There is one and only one kind of real internationalism and that is - working unconditionally for the development of the revolutionary movement and revolutionary struggle in one's own country, supporting (with propaganda,

solidarity and material aid) this struggle, this and only this line in every country without exception'

Mao

"History shows that wars are divided into two categories: just wars and unjust wars. All progressive wars are just, and all wars that impede progress are unjust. We communists oppose all unjust wars that impede progress. We communists not only do not oppose just wars, but we actively participate in them. The First World War is an example of an unjust war: the two sides fought for imperialist interests, and that is why communists all over the world resolutely opposed it. The means of opposing such a war is to do everything possible to prevent it before it breaks out, but once it has broken out, one must oppose the war with war, oppose the unjust war with the just war, whenever possible."
