Statement by Central Committee 01/2026 – January 3, 2026

**Solidarity with Bolivarian Venezuela is an important aspect of the struggle of the exploited classes and oppressed people around the world against the International Community of US, Zionist and European imperialist groups and the Third World War they are spreading!**

On the night between January 2nd and 3rd, US imperialist groups bombed several military and civilian installations in Caracas and several federal states (La Guaira, Aragua, Miranda) with drones and missiles. An elite US military commando kidnapped President Nicolás Maduro and his wife, Cilia Flores. The military attack against Venezuela is a further step in the escalation of World War III. Together with the more than 40 military conflicts currently underway around the world, the threats and attempts at destabilization against the Islamic Republic of Iran, the bombings carried out on December 25 in northwestern Nigeria, the interference in the recent elections held in Argentina and Honduras, the arms supplies to Taiwan, the maneuvers to create a NATO in the Pacific region, the economic, commercial and financial sanctions, the operations of infiltration, sabotage, political destabilization and "regime change", the trade war, the arms race and the war economy within individual countries, they make up the picture of the Third World War (WW3) produced by the economic, cultural, political, diplomatic and military upheaval underway in the world still dominated by the International Community of US, Zionist, European imperialist groups and their associates.

Ending the WW3 requires a jump bid of the socialist revolution in the imperialist countries: breaking the chains of the International Community in at least one of the imperialist countries will pave the way and show the way to the popular masses in the other countries as well!

**May we, in our country and throughout the world, show solidarity with the Bolivarian authorities, with the internationalist and anti-imperialist work they are carrying out, and with the social transformation underway in the country!**

Bolivarian Venezuela has become a target of the US imperialists and their accomplices because it represents hope for oppressed people and a threat to the imperialist system: it demonstrates that "it can be done" despite boycotts, sabotage, attempts to assassinate revolutionary leaders, and other criminal operations promoted by the imperialist bourgeoisie and its clergy.

The experience of the Bolivarian government has confirmed what the first socialist countries demonstrated on a large scale, and what Cuba, the Democratic People's Republic of Korea, the Islamic Republic of Iran, and others demonstrate today, to a certain extent. A government fighting for national sovereignty finds international alliances, leverage, and contradictions it can exploit to counter economic blackmail and other maneuvers by imperialist groups: resorting to smuggling, developing collaboration with "rogue states", promoting trade with countries that have strong conflicts with the US imperialists, and exploiting every capitalist's need to sell: because the capitalist produces goods, he must sell them to valorize his capital! Bolivarian Venezuela show that it is possible to circumvent unilateral coercive measures and resist the economic blackmail of the International Community of US-NATO, Zionist, and European imperialist

groups.

The Bolivarian Revolution has advanced by strengthening the role of the Communes, that is, by mobilizing the masses to take control of growing parts of the country's activities. The Communes are the mean through which the organized masses are taking control of industrial production, commercial activities, culture, education, healthcare, and public security: they are an expression of the power exercised by the Venezuelan people and the principal mean through which the Bolivarian Revolution advances toward the establishment of socialism. Each Commune is equipped with collectively controlled means of production, its own elected legislative body, its own executive council, and its own banks. As of December 2025, there were 4,015 urban, rural, mixed urban-rural, and indigenous Communes (intermediate structure), each composed of 49,185 Municipal Councils (basic structure). The development of the Communes has allowed the Venezuelan people to defend themselves from attempted coups by the local comprador bourgeoisie subjugated by US imperialism, to withstand bosses' lockouts and commodities' blockades, to defend the achievements of the Bolivarian Revolution, and to withstand the more than 13 years of intensified economic, commercial, and financial blockade imposed by the International Community of US, Zionist, and EU imperialist groups. It is on this basis that the Bolivarian government, after declaring a state of emergency due to external circumstances, has now declared that the Bolivarian Revolution has entered the phase of "protracted armed struggle," part of the strategy of a war of all the people: militarization of the entire country for defensive purposes, involving approximately 7 million citizens trained in the use of weapons. The general order is: unity of all sectors of the popular masses in the struggle to expel the invader!

Bolivarian Venezuela is among those states that refuse to bow to the demands of the International Community of the imperialists (primarily the US), their raids, trafficking, deals, and oppression, and engage in significant and intense anti-imperialist activity. With this in mind, it has developed collaborative and trade relations with the People's Republic of China which with BRICS+ is uniting countries whose authorities seek to free themselves from the political, military, economic and financial domination of the US imperialists.

**Solidarity with Bolivarian Venezuela means fighting to oust the Meloni government, to put an end to the arms race and the war economy whose the recently imposed budget law is an expression, to put an end to our country's subjugation to the US-NATO imperialists and its complicity with the Israeli Zionists!**

10, 100, 1000 demonstrations, sit-ins and protest initiatives targeting the embassy, consulates and other US institutional offices, military bases and other US-NATO installations that dot our country!

10, 100, 1000 demonstrations, sit-ins, and protest initiatives against the Meloni government, servant of the US imperialists, accomplice of the Zionists, and companion of the EU (imperialists)!

It's pointless to "ask Meloni to condemn the US attack on Venezuela." We need to ramp up the fight against the Meloni government until it's ousted and replaced with a popular emergency government.

The establishment of the People's Bloc Government is the first and decisive step towards disengaging Italy from NATO (even if only by re-establishing Italian state power over US and NATO bases, banning nuclear weapons exercises there and their use as a rear base for war missions, subjecting US soldiers to Italian law, halting our country's participation in war missions and economic sanctions against other countries), putting an end to the with the Israeli Zionists (implementing a large-scale policy of suspending all agreements and severing all ties between our country and the Zionist state of Israel, divesting resources engaged in business and trade with Israel, and imposing sanctions against any political, economic, academic, etc. entity involved with the Zionist state of Israel), in order to break the spiral of war and rearmament.

Italian communists and communist from other imperialist countries can provide significant support to the revolutionary movement underway in Venezuela. The first imperialist country where the masses break the shackles of the International Community of US, Zionist, and European imperialist groups will open the way to socialist revolution for the masses of other imperialist countries as well. The (new)ICP is working tirelessly to ensure that Italy assumes this role in the world, exploiting the favourable conditions for socialist revolution in our country. The socialist revolution, therefore, immediately and as its first step the establishment of the People's Bloc Government, is also for the masses of our country the only way out of the economic, ecological, cultural, and social chaos into which they are daily plunged by the maneuvers and contortions of the imperialist bourgeoisie, the clergy, and the authorities of the Papal Republic to protract their existence and privileges despite the general crisis of capitalism.

**Our solidarity with Bolivarian Venezuela consists in a firm commitment: to continue the socialist revolution in Italy until victory and thus contribute to opening the road to socialism for the popular masses of the other imperialist countries of Europe and America and to the liberation struggle of the people of the whole world.**

World War III is not the result of the ill will, madness, or miscalculations of Trump, Netanyahu, or other members of the International Community of US, Zionist, and European imperialist groups, and the criminals who rule their countries. War is the last resort resorted to by the imperialist bourgeoisie to address the general crisis of its system (a crisis rooted in the absolute overproduction of capital).

The ongoing WW3 is both a competitor and an alternative to the development of the proletarian revolution (socialist or new democratic). The WW3 and the proletarian revolution are the two currents competing for supremacy throughout humanity, given the unification of the world that occurred in the imperialist era and particularly with globalization. Only the development of the proletarian revolution will end the WW3. Either by promoting the proletarian revolution we end the war, or by taking advantage of the development of the war we accelerate the proletarian revolution.

The establishment of socialism in an imperialist country like Italy, even just a decisive jump bid of the socialist revolution such as the establishment of a People's Bloc Government, would break the destructive spiral into which the rule of the imperialist bourgeoisie is dragging the popular masses of the entire world, similarly to how the Russian communists, with the revolution culminating in the October 1917 insurrection, broke the course of events that led the great world imperialist groups to clash for world domination and gave rise to the first global wave of the proletarian revolution.

**Long live the Bolivarian Revolution and the legacy of Comandante Chávez!  
Imperialism is a colossus with feet of clay! The future belongs to communism!**
