

October 28, 2023 Statement

Popular Front for the Liberation of Palestine

Retrieved from <https://t.me/PalestineResist/17055>

The duty of the nation and supporters of Palestine is to escalate the struggle against the forces of aggression.

The primary duty of all forces supporting the right of the Palestinian people and opposing the genocidal war against them is to intensify their struggle against the countries involved in the aggression and war against our people. This comes in light of escalating genocidal crimes and the cutting off of all communications with Gaza in an attempt to hide the massive and egregious crimes committed by the enemy against unarmed women, children, and the elderly.

It is inconceivable, after the fall of about 8,000 martyrs, tens of thousands injured, and the displacement of one and a half million Palestinians in Gaza, along with daily genocidal crimes, that the international and Arab response would be at this level. The UN General Assembly's statements have been weak, the European Union's stance is hostile and supports the continuation of genocide, and the positions of the United States and Britain are fully involved in the criminal war against our people.

This aggressive alliance will not be dismantled by timid positions or half-hearted stances, but requires an escalation of serious revolutionary action against all these forces, primarily the United States and the other forces of the aggression alliance. Their embassies and bases remain active and present in Arab countries and around the world, untouched by even the minimum amount of protest.

The Front expresses its deep appreciation for every act of solidarity. Still, the scale of Zionist crimes against our people requires much more. The magnitude of the massacre and genocidal war should shake the world and mobilize all Arab, friendly forces, and supporters of freedom worldwide.

The Front calls for escalating the struggle and focusing on the embassies of the countries of the aggression alliance and its supporters, considering America as the spearhead of this aggression. They should realize the consequences of their actions and their clear complicity in the killing our children and in the massacres and genocidal war against our people.

Providing justifications and excuses to lower the level of revolutionary and solidarity action to symbolic and formal levels is a stab in the back of Palestine and its people, and will comfort the aggression alliance to give it space to continue crimes against our people. The Front reaffirms its previous call for a mass flood towards the embassies, interests, and bases of the aggression forces and a greater role for solidarity parties and forces in escalating the struggle against the alliance of enemies worldwide.
